BUENA PARK LIBRARY DISTRICT

The Buena Park Library District was officially formed on June 4, 1919, under the Education Code of California, Sections 19640-19664. This free public library, governed by a five-member elected Board of Trustees, serves a population of 84,000. The Library District offers a wide variety of library programs and services to appeal to children, teens and adults in our community including author talks, story times, science programs, and special events. The library collection consists of print books, books on CD, DVDs, music CDs, streaming video and audios, eBooks and eAudiobooks, and mobile hotspots. Library patrons can also access a variety of digital resources including encyclopedias and other databases with their library card. The Buena Park Library District is also a United States Passport Acceptance Facility and can provide passport services to eligible individuals.

Our Mission

- The Buena Park Library is committed to providing free and equal access to information, programs and services to educate, entertain and enrich the lives of our diverse community.

Our Vision

- The Buena Park Library is our community's center for discovery, lifelong learning, enjoyment, and connection with others.

CAPISTRANO BAY COMMUNITY SERVICES DISTRICT

This Community Services District was formed in December 1959 by Resolution of the Orange County Board of Supervisors in accordance with the provisions of Government Code Section 61600.

The District is responsible for providing a variety of municipal services to 196 residential properties located on the beach of Capistrano Bay. Those services include:

- ✓ Trash Collection
- ✓ Infrastructure Maintenance
- ✓ Street Lighting
- ✓ Flood Control
- ✓ Police & Security Services

COSTA MESA SANITARY DISTRICT

The Costa Mesa Sanitary District (CMSD) is an independent special district formed in 1944 under the Sanitary District Act of 1923. Our boundaries encompass the city of Costa Mesa and small portions of Newport Beach and unincorporated Orange County, serving a population of approximately 118,000.

As a sanitary district, we are responsible for residential solid waste (trash) collection and its transmittal to recycling facilities for sorting, recycling and disposal. Additionally, we maintain a wastewater (sewer) collection system that collects and transmits wastewater to Orange County Sanitation District facilities for treatment and recycling. These core responsibilities are accomplished through a combination of public and private services, which include an in-house administrative and wastewater maintenance staff and a privately contracted trash hauler, attorney, and treasurer.

In addition to collecting and transporting solid waste and wastewater, CMSD offers several special programs as a benefit to customers:

- **Large Item Collection** – Three complementary bulky item pickups per year, with up to ten items per pickup.
- **Household Hazardous Waste (HHW) Collection** – Safe and free pickup of HHW, such as unwanted paint, batteries, motor oil, and pesticide at your doorstep.
- **Residential Fats, Oils & Grease (FOG) Recycling** – Customers can soak up FOG with a napkin or paper towel and place it in the Organics Cart, along with food waste and green waste for recycling. Larger amounts of FOG can be cooled and collected in a sturdy container and placed in the Mixed Waste Cart for safe disposal.
- **Eco Expo** – A free annual event hosted by CMSD where residents learn about sustainability best practices and walk away with tips and free tools to reduce their household waste.
- **Sewer Inspection Rebate Program (SIRP)** – Residential customers can get rebates of up to \$500 to perform a proactive closed-circuit television video of their sewer lateral or install a clean-out.
- **Shredding and Compost Giveaway Event** – An annual event for customers to avail of free paper shredding and pickup of 2 free 30-lb. bags of compost.
- **Sustainability Star Program** – Residents and local businesses are highlighted on social media and in CMSD's quarterly newsletter for exemplifying sustainability in the community.
- **Christmas Tree Recycling** – For a few weeks following Christmas, trees are collected and recycled into compost and renewable natural gas using anaerobic digestion technology.
- **GoCMSD App** – Customers can quickly and easily report an issue or schedule a pickup request with the free GoCMSD smart phone and web app.
- **Alkaline Battery Recycling Contest** – In an effort to educate youth about the importance of protecting the environment, CMSD sponsors an annual Alkaline Battery Recycling Contest among local schools. All participants receive monetary prizes ranging from \$100-\$1200.

Mission: To protect public health and the environment for current and future generations

Vision: Leading a community that is free from solid waste and wastewater pollution

Just Cause: Keeping our water environment pollution free

EAST ORANGE COUNTY WATER DISTRICT

The East Orange County Water District was formed in 1961 (under County Water District Law, Section 30,000; et seq.) to provide water imported to the 10 square mile area within its boundaries. The District presently serves wholesale water to a population estimated at 100,000 located in the central foothill area of Orange County approximately 30 miles south of the City of Los Angeles. The District also provides retail water service to approximately 5,000 residents of unincorporated area within its service area.

WHOLESALE OPERATIONS

The Wholesale District reservoirs and pipeline transmission systems annually deliver an average of 6 million gallons of water per day to five sub-agencies: 1) City of Tustin 2) Golden State Water Company 3) City of Orange 4) Irvine Ranch Water District and 5) the District's own Retail Zone customers. All of the sub-agencies use groundwater to supplement the imported water.

RETAIL OPERATIONS

In 1985, the District was approached by the County of Orange to take over the operation of their small Retail Water Works System #8. This transfer was completed in July 1985, and the now renamed "Retail Zone" moved the District into the field of retail water operations (supplying water directly to the consumer).

The East Orange County Water District Retail Zone covers an area of about 600 acres in unincorporated Orange County between the cities of Orange and Tustin. As of 2012, the District serves a population of about 5,000 through a system of 1,209 service connections. Average annual water use for the past eight years is about 800,000 gallons per year.

WASTEWATER OPERATIONS

In 2016, the District took over operations of OC San's Area 7 Local Sewer System. The sewer system encompasses about 7,700 acres and includes portions of the City of Orange, the City of Tustin and unincorporated communities of Lemon Heights, North Tustin, Cowan Heights, and Panorama Heights. The system serves an estimated population of 81,000 people.

GENERAL

The governing body of the EOCWD is comprised of an elected five member Board of Directors. The registered voters in the District elect board members at large for alternating four-year terms. The Board of Directors appoints a General Manager to direct the operations of the Wholesale and Retail Zone systems.

EL TORO WATER DISTRICT

El Toro Water District (ETWD) was formed on September 26, 1960 by the landowners of the District under the laws applicable to California Water Districts (Division 13, Section 34000 et seq. of the Water Code of the State of California). In the past, the District served as a public wholesale water agency providing water for agriculture and ranching purposes in addition to supplying one privately owned retail water and sewer company. In September 1983, ETWD purchased the assets of the privately owned utility to become a full retail water and sewer service provider.

ETWD provides water, sewer and recycled water service to an approximate population of 50,000 people, residing in five cities including all of the City of Laguna Woods and portions of the cities of Mission Viejo, Laguna Hills, Aliso Viejo and Lake Forest.

The District's total annual potable water demand is approximately 7,000 acre feet provided through the District's 8,285 residential and 1,220 commercial, irrigation, industrial and institutional service connections.

The District's Water Recycling Plant treats, on average, 3.6 million gallons per day of tributary wastewater and currently recycles approximately 1,500 acre feet per year for beneficial reuse.

EMERALD BAY SERVICE DISTRICT

EMERALD BAY SERVICE DISTRICT

The Emerald Bay Service District was formed in 1961 in accordance with the Community Services District Law of the State of California. The District is located near Laguna Beach, in unincorporated Orange County, within the community of Emerald Bay.

The District is governed by a five member Board of Directors. Voters within the geographic boundaries of the District elect the Board. The District serves an approximate population of 2,000 within 150 acres.

The District provides sewer, water, street improvement for hydrology and flood control, emergency preparedness, security and law enforcement and parks and recreation services. The District is a member of the Municipal Water District of Orange County (MWDOC) and a member of the South Orange County Wastewater Authority (SOCWA).

IRVINE RANCH WATER DISTRICT

The Irvine Ranch Water District, established in 1961, provides high-quality drinking water, reliable wastewater management, ground-breaking recycled water programs, and environmentally-sound urban runoff treatment to more than 390,000 residents in Central Orange County. IRWD encompasses approximately 181 square miles extending from the Pacific Coast to the foothills, and serves the city of Irvine and portions of Costa Mesa, Lake Forest, Newport Beach, Orange, Tustin and several unincorporated areas of Orange County.

IRWD continuously strives to achieve greater customer satisfaction, increased reliability and resource conservation, and to build excellent relationships within the community. As an independent special district, organized under the California Water District Code, IRWD is governed by a five member, publicly elected board of directors.

Water Supply Portfolio

IRWD manages a diverse water supply which ensures reliable supplies during times of drought, regulatory constraints and emergencies, that helps to keep rates low. The IRWD water supply comes from local groundwater, recycled water, imported water, and local surface water. IRWD is a leader in the area of recycled water, and meets roughly 27,000 acre-feet of the service area's water demands with recycled water. Every gallon of recycled water used results in a gallon of drinking water that can be saved for potable uses. Using recycled water extends drinking water supplies and reduces reliance on costly imported water supplies, helping to improve water supply reliability.

IRWD uses recycled water for:

- Agricultural and landscape irrigation including parks, school grounds, golf courses, freeway landscaping and common areas managed by homeowner associations
- Landscape irrigation on large residential lots
- Industrial purposes such as concrete mixing and cooling towers
- More than 60 dual-plumbed office buildings

Water Use Efficiency

IRWD also offers cutting-edge conservation and water use efficiency programs so customers have the tools needed to use water wisely. The District employs a unique allocation-based billing structure that rewards customers for conserving water. Since its implementation in 1991, the allocation-based rate structure has help IRWD customers increase their water use efficiency. The result is that over the last twenty years, IRWD customers have significantly reduced their average daily water use.

Mission Statement

“The mission of Irvine Ranch Water District, a public agency, is to provide high quality water and sewer services in an efficient, cost effective, and environmentally sensitive manner which produces a high level of customer satisfaction”

MESA WATER DISTRICT

Founded on January 1, 1960, Mesa Water District (Mesa Water®) is an AAA-rated independent special district that provides high-quality, affordable, safe water to 108,000 customers in an 18-square-mile area in Orange County, Calif. Mesa Water® serves most of Costa Mesa, parts of Newport Beach, and some unincorporated areas of Orange County including John Wayne Airport, with water that meets or surpasses all Federal and State drinking water regulations.

Due to the District's improved Mesa Water Reliability Facility (MWRF) – which returned to service in 2012 – Mesa Water® meets 100 percent of its community's water needs with locally-sourced water as the main supply, and imported water as the backup supply. This is unique for water providers in Orange County and Southern California, and ensures drought- resilience for Mesa Water's service area for the next hundred years or more.

With over 24,000 service connections and approximately 350 miles of pipeline, Mesa Water® delivers approximately 17,500 AF/YR, with potable water produced from groundwater wells and non-potable (recycled) water purchased from the Orange County Water District (OCWD). Mesa Water® also has the option of purchasing potable water from the Municipal Water District of Orange County (MWDOC).

Mesa Water's revenues result solely from its activities as a water utility; no tax revenues of any kind are received. Mesa Water® is also one of the more operationally efficient public water agencies in Orange County, based on expenditures per capita.

Mesa Water® practices perpetual infrastructure renewal and replacement which has resulted in the District achieving one of the lowest rates of water loss among North American water systems. By offering voluntary water use efficiency programs and water awareness education and outreach, Mesa Water® has already met the 20x2020 water conservation mandate.

Mesa Water® is governed by a publicly elected five-member Board of Directors whose members serve overlapping four-year terms. Each director represents one of five geographic Mesa Water divisions of approximately equal population.

Mesa Water's Board elects one of its members to serve as President, and another to serve as Vice President. The Board also appoints the General Manager, District Secretary, and District Treasurer. The General Manager is responsible for the day-to-day operations and administration, in accordance with the Board's policies.

Mesa Water® recruits and retains highly experienced, talented employees committed to professional excellence in performing their work for the District. Mesa Water® provides excellent customer service with 90 percent approval rating, from customers who know the District as their water provider, according to a recent survey.

MIDWAY CITY SANITARY DISTRICT

The Midway City Sanitary District was formed in 1939 under the Sanitary Act of the California Health and Safety Code. It is celebrating its 84th year of quality service to the residents of Westminster and Midway City.

Through a dedicated staff of 30, the District provides refuse collection and sewer service to more than 103,000 residents in the City of Westminster and the unincorporated county area known as Midway City. Committed to superior public service, the District implemented automated refuse collection and instituted an innovative recycling program. This action improved customer service, cut costs, and greatly reduced waste disposal at County landfills – all with a significantly smaller and more efficient staff.

Mission Statement

“The Board of Directors and Employees of Midway City Sanitary District work diligently to provide sewer and solid waste services to the residents of the District. Our top priority is to accomplish this in an ethical, efficient, and cost-effective manner that will protect the health and safety of those we serve”

MOULTON NIGUEL WATER DISTRICT

In 1960, the land encompassed by the Moulton Niguel Water District held a total population of eight. The prudent landowners found their sparse underground water supply depleting and, foreseeing the dramatic changes in development in store for their agricultural lands, formed Moulton Niguel Water District as a California Water District on November 16, 1960. Then, in 1961, the District entered into several agreements with surrounding water agencies to bring a reliable supply of water to the area.

The District joined other surrounding districts to participate in the construction of an additional source of treated water, the Diemer Intertie (Allen-McColloch Pipeline), in 1981. Today, Moulton Niguel Water District is able to serve the water and wastewater needs of residents within Laguna Niguel and portions of the Aliso Viejo, Mission Viejo, Laguna Hills, and Dana Point areas.

From an original population of eight, the District currently services more than 170,000 residents by means of an elaborate system consisting of over 54,000 potable water connections, 39 pump stations, 28 potable water reservoirs storing a combined capacity of 72 million gallons of water, and over 700 miles of potable water pipelines.

The Board of Directors of the District elected to become a major participant in the Joint Regional Wastewater Treatment Plant, located in Laguna Niguel, where wastewater is recycled for irrigation purposes and for use in open areas such as golf courses, parks and slopes. The District maintains 148 miles of recycled water pipelines and 12 recycled water reservoirs. In addition to the potable and recycled water pipelines and facilities, the District also maintains 537 miles of sewer pipelines, and over 50,000 sewer service connections.

MUNICIPAL WATER DISTRICT OF ORANGE COUNTY

The Municipal Water District of Orange County (MWDOC) is a wholesale water supplier and resource planning agency. Our efforts focus on sound planning and appropriate investments in water supply development, water use efficiency, public information, legislative advocacy, water education, and emergency preparedness. MWDOC's service area covers all of Orange County, with the exception of the cities of Anaheim, Fullerton, and Santa Ana. The district serves Orange County through 27 retail water agencies.

Local water supplies meet nearly half of Orange County's total water demand. To meet the remaining demand, MWDOC purchases imported water – from northern California and the Colorado River – through the [Metropolitan Water District of Southern California \(Metropolitan\)](#). They deliver this water to its 28 client agencies, who provide retail water services to the public.

The Municipal Water District of Orange County is committed to providing a reliable supply of high quality water for Orange County. Working closely with Metropolitan and client agencies, the staff looks for opportunities to improve Orange County's water resources and reliability. By integrating local planning challenges and regional stakeholder partnerships, MWDOC maximizes water system reliability and overall system efficiencies. The district works to expand Orange County's water supply portfolio by providing planning and local resource development in the areas of recycled water, groundwater, ocean water, and conservation. One example of these efforts is the South Orange Coastal Ocean Desalination Project, which seeks to develop south Orange County's local water supplies. Providing client agencies with value-added services, the district offers assistance on demand projections, mapping, urban water management planning, rate structure development, and water shortage mitigation plans.

MWDOC is governed by a seven-member Board of Directors. Each director is elected by the public to represent a specific portion of Orange County. MWDOC also appoints four representatives to advocate the interests of Orange County on the Metropolitan Board. MWDOC is the third largest Metropolitan member agency and holds key leadership positions on the Board of Directors that oversee policy development, strategy, and implementation.

Mission Statement

“To provide reliable, high-quality supplies from MWD and other sources to meet present and future needs, at an equitable and economical cost, and to promote water use efficiency for all of Orange County”

ORANGE COUNTY CEMETERY DISTRICT

The Orange County Cemetery District is an independent special district governed by an appointed Board of Trustees who serve fixed four-year terms. The District operates under the provisions of the State Health and Safety Code sections 9000 et. seq.

The three cemeteries owned and operated by the District are among the County's oldest and most established, with each having recorded burials prior to 1900.

Although privately owned in the beginning, the cemeteries were formed into separate independent districts in 1926. In 1985, the districts were consolidated under one governing board to create the Orange County Cemetery District. The District, with a combined area of approximately 69 acres, encompasses the entire county and includes the El Toro Memorial Park, Santa Ana Cemetery and Anaheim Cemetery. The District is working on the development of a fourth cemetery which will be located in Anaheim Hills.

The mission of the District, achieved through the efforts of 27 dedicated employees, is to manage and maintain Orange County's public cemeteries in a manner that preserves their beauty, dignity, historical and cultural values, and offers affordable interment services for county residents.

ORANGE COUNTY MOSQUITO AND VECTOR CONTROL DISTRICT

The Orange County Mosquito and Vector Control District (OCMVCD) was established in 1947, originally as the Orange County Mosquito Abatement District. The District is responsible for protecting the growing population of Orange County from mosquitoes and mosquito-borne diseases, Red Imported Fire Ants (RIFA), rats, flies, and other vectors.

As of 2022, the Orange County Mosquito and Vector Control District employs 69 full time employees. The District encompasses all of Orange County's over 800 square miles and is governed by a board of trustees consisting of a representative from each of the 34 cities as well one from the County of Orange.

The mission of the Orange County Mosquito and Vector Control District is to educate and protect Orange County from vectors and prevention of vector-borne diseases in an environmentally responsible manner.

For more information, please visit the Districts website at www.ocvector.org.

ORANGE COUNTY WATER DISTRICT

The Orange County Water District is a groundwater wholesale agency responsible for managing and protecting the Orange County Groundwater Basin. The basin is a vital resource that provides 85% of the water supply to 19 cities and retail water districts, who serve a collective 2.5 million people in north and central Orange County. Since 1933, OCWD has implemented cutting-edge programs and projects to maximize local water resources, enhance water reliability, ensure high-quality water, prevent seawater intrusion, and protect Orange County's rights to Santa Ana River water.

ROSSMOOR COMMUNITY SERVICES DISTRICT

HISTORY:

In the early 1980s the County was faced with a sizeable deficit in County Service Area 21. Rossmoor had three choices: Cut services, consolidate CSA 21 with other CSAs in the county, or form an independent CSD for Rossmoor. After considerable study by a citizens group, it was recommended that Rossmoor voters approve the formation of a Community Services District, which would be the most advantageous choice financially for Rossmoor. A Special District has many of the powers of a city with the notable exception of land-use planning.

The RCSD was formed in November 1986 as a result of a general election of Rossmoor voters to replace the Rossmoor County Service Area No. 21 (CSA 21). At that election, a majority of Rossmoor voters approved an order adopted on June 25, 1986 by the Board of Supervisors of Orange County to form the RCSD and concurrently dissolve the Rossmoor CSA 21, to establish that the boundaries of RCSD would be the entire territory of the unincorporated Rossmoor Community, that the RCSD would be the successor agency to the Rossmoor CSA 21 and take over the assets and assume all liabilities and obligations of the Rossmoor CSA 21, and to elect a five member Board of Directors for RCSD.

POWERS GRANTED IN 1986:

The Powers granted to the RCSD were: public recreation facilities and services, street lighting, road rights-of-way services, sewer services and, subject to the consent of the County of Orange, the collection and disposal of garbage or refuse matter. They included the specific services previously provided by Rossmoor CSA 21 which were: local park development and maintenance, road related landscape maintenance, street sweeping and community center/recreation programs. At that time, this included Rossmoor Park, the mini-parks and Montecito Center. In November 1990, the Rossmoor voters approved a ballot measure to acquire Rush School and surrounding grounds and to tax themselves to pay for one or more bonds to acquire the property.

Today, approximately 10,500 residents make their home in this unincorporated bedroom community located behind a signature brick wall situated between the cities of Seal Beach and Los Alamitos. The Special District of Rossmoor is governed by a five member Board of Directors, who are elected by the residents of Rossmoor and operates under the supervision of a General Manager. Rossmoor is known for its splendid urban forest, beautiful homes and strong family values.

ROSSMOOR / LOS ALAMITOS AREA SEWER DISTRICT

The Rossmoor / Los Alamitos Area Sewer District was founded in 1952 to provide wastewater collection and disposal in West Orange County. It is one of the area's oldest local governments. At the time, the community of Los Alamitos was unincorporated. The lack of a sewage collection system and local septic tank failures caused serious problems for residents and restricted development. A method had to be found to provide a public wastewater collection and disposal system.

By 1952, citizens in the area voted overwhelmingly in favor of bonds for construction of an adequate sewer system to replace the outdated septic tanks. Agreements were reached with other agencies to receive the Los Alamitos wastewater and treat it.

Major annexations made in 1954 and 1960 added the Rossmoor residential development and the nearby Naval Base.

Today the District services over 8,000 sewer connections. The 54-mile system covers over 4,000 acres and consists of pipelines ranging from 8-18 inches in diameter, installed along the public right-of-way. Major trunks run along Foster Road, Los Alamitos Boulevard, and Katella Avenue. The system discharges into the Orange County Sanitation District for treatment.

SANTA MARGARITA WATER DISTRICT

The Santa Margarita Water District (SMWD) was established in 1964 as a landowner district (Section 35306 of the California Water Code) by a group of ranchers who wanted to create a reliable source of water for their cattle. South Orange County was primarily rural then, and SMWD provided water to more cows than people.

Today, the District is the second-largest in Orange County, providing water and sewer service for more than 155,000 people who live in the City of Rancho Santa Margarita and the communities of Coto de Caza and Ladera Ranch as well as Talega in San Clemente and a portion of Mission Viejo. The District also serves the new communities of Rancho Mission Viejo.

Reorganized as a registered voter California Water District (California Water District legislation is Section 34000 of the California Water Code) in 1995, five Directors elected at large within SMWD boundaries govern the District. Over 50 years, SMWD has emerged as a leader in developing local reserves with the 244-million-gallon Upper Chiquita Reservoir, which is the largest domestic-water reservoir built in the region in 45 years.

Santa Margarita Water District is also enhancing its use of recycled and reclaimed water. The 1.3-billion-gallon Upper Oso Reservoir opened in 1979, and the District continues to move ahead with expansions to its recycled and reclaimed water efforts, from expanding production of tertiary water at the Chiquita Water Reclamation Plant, a 6 mgd facility, and with run-off detention basins such as Cañada Gobernadora Multipurpose Basin, a 30- acre detention basin completed in 2014 that is expected to collect 350 to 750 acre feet of runoff annually for reuse as irrigation water.

SERRANO WATER DISTRICT

The District services an area of approximately 3,000 acres which includes the city of Villa Park and a minor portion of the city of Orange. The number of domestic meters in service is approximately 2,250 with approximately 1,950 connections in Villa Park and approximately 300 connections in Orange. The population served by the District is approximately 6,165 in Villa Park and approximately 400 in Orange.

The District's principal source of water is native water drawn from Santiago Reservoir (Irvine Lake). Santiago Reservoir is supplied from a 44 square mile watershed. The District also has three operable water wells. The Walter E. Howiler, Jr. Water Treatment Plant was constructed in 1997. From the treatment plant, water is then pumped through the delivery pipe system. The District maintains generators at the treatment plant and at the Smith Reservoir which allow water to be supplied to customers in the event of power outage.

**SILVERADO-MODJESKA RECREATION
AND PARKS DISTRICT**

The Silverado-Modjeska Recreation and Park District is a California Special District formed on March 22, 1961 under California Resource Code Chapter 4, Division 5. The SMRPD is recognized as an Open Space Special District by the Local Area Formation Committee and the Orange County Board of Supervisors. The District covers approximately 65 square miles of eastern Orange County roughly E/W from Live Oak Canyon Road to the 241 Toll Road and N/S from the Riverside/Orange County line to Santiago Canyon Road.

The SMRPD currently manages several park and community assets, including:

- Silverado Park/Silverado Community Center
- Modjeska Park/Modjeska Community Center

Mission Statement

"To promote community well-being through programs and activities that protect, preserve and enrich the canyons' heritage, open space and unique way of life"

SOUTH COAST WATER DISTRICT

On July 29, 1932, through the efforts of the first District Directors, Laguna Beach delivered water to the south coast area. In 1939, Laguna Beach's water supply from Huntington Beach wells became inadequate and it was critical that a "dependable" water supply be found. The solution was to join the Metropolitan Water District of Southern California. On July 15, 1942, Coastal Municipal Water District was formed and became the 14th member agency of the MWD. A large water line from Santa Ana was built at a cost of approximately \$1,130,000, and South Coast Water District had a "guaranteed" supply of water for the first time.

The South Laguna Sanitary District was organized in 1947 to develop a publicly-owned sewage collection, treatment and disposal system to replace individually-owned septic tanks.

In 1954, after a successful bond election of \$1,125,000, the area's first sewage system was installed, together with a small primary treatment plant. The treatment plant in Aliso Canyon was improved and expanded over the years and is now an integral part of the South Orange County Wastewater Authority comprised of ten agencies: El Toro Water District, Moulton Niguel Water District, the City of Laguna Beach, Emerald Bay Service District, Irvine Ranch Water District (formerly Los Alisos Water District), South Coast Water District, Santa Margarita Water District, City of San Juan Capistrano, City of San Clemente, and Trabuco Canyon Water District.

From the beginning, the Sanitary District shared office space and some personnel with the Water District. In the interest of economy and efficiency, the two districts merged in July 1976. At this time, the number of water board members was increased from five to seven, the Sanitary District was dissolved, and all of its plants and properties, together with its personnel, were absorbed by the South Coast Water District.

In July 1997, the District detached the residential area known as Laguna Sur and Monarch Point to the Moulton Niguel Water District. The District continues to provide sewer collection to those communities via contract with MNWD.

In January 1999, the District consolidated the Capistrano Beach Water District and dissolved the Dana Point Sanitary District, with South Coast becoming the legal successor to both. The Board of Directors was expanded to eleven (due to resignations was decreased to seven). In November 2000 the seven board of directors were elected by "division" and no longer at large.

In July 1999, the District detached the community of South Laguna to the City of Laguna Beach. By contract, the District continues to provide water, recycled water and wastewater collection services to this community.

In March 2000, the District became the contract operator of the Tri-Cities M.W.D. facilities, now known as the Joint Regional Water Supply System (JRWSS).

For the November 2002 election, the Board of Directors voted to reduce the Board to five members to be elected at large.

SUNSET BEACH SANITARY DISTRICT

Address: P.O. Box 1185, Sunset Beach, CA 90742-1185

Phone: (562) 493-9932 (answering service)

TRABUCO CANYON WATER DISTRICT

The Trabuco Canyon Water District is a county water district organized and operated pursuant to Section 30000 of the Water Code of the State of California. The District was organized on February 26, 1962.

TCWD provides retail water service, wastewater treatment and reclamation services to over 4,000 metered connections and serves a population of 12,700.

The District includes 9,000 acres in the southeast portion of Orange County at the foothills of the Santa Ana Mountains and is comprised of numerous canyons and hills with varying elevations from 900 to 2,400 feet above sea level.

YORBA LINDA WATER DISTRICT

Yorba Linda Water District serves reliable water and sewer services to residents and businesses of Yorba Linda, portions of Placentia, Brea, Anaheim, and areas of unincorporated Orange County. The District is dedicated to maintaining financial integrity and superior customer service while protecting public health and the environment. Most of the District's water is from wells that tap into the Orange County Groundwater Basin, an underground aquifer that underlies most of northern Orange County.

Mission Statement

“Yorba Linda Water District will provide reliable water and sewer services to protect public health and the environment with financial integrity and superior customer service.”
